Education

UNIVERSITY OF NEBRASKA AT OMAHA

Master of Science in Data Science

2024-2027

Bachelor of Information Technology

2020-2022

Experience

Conagra Brands

Business Services Analyst

September 2025 - Current

- Leading company-wide initiative to deprecate VBScript, evaluating replacement technologies and developing a migration roadmap to modernize legacy automation infrastructure
- Built and deployed automation solutions across Accounts Payable processes, contributing to a fully automated department workflow with minimal manual intervention
- Automated daily SAP spool extracts using Python and Power Automate to support timely operational analysis and reporting
- Developed automated workflows with SAP for Canada Deduction Reversals, reducing manual intervention and improving processing accuracy
- Created and maintained Databricks tables to track open Walmart cases, enabling centralized analysis and reporting

Data Analyst – Internal Audit

May 2024 – September 2025

- Developed and trained GPT's in Institute of Internal Auditor Standards (IIA), Plant Risk Assessment and Audit Methodologies to enhance efficiency and compliance with IIA Standards
- Designed and implemented a Location-Based Risk Factor model by integrating 40+ data sources via Alteryx and aggregating insights at the plant level
- Delivered Power BI dashboard to visualize and weight rank operational risks across all locations
- Directed quarterly team meetings to present new data products and enhancements, driving engagement and aligning analytic initiatives with the audit team
- Led the Coman Risk Assessment Project which helped the organization visualize Coman financials, production and risks involved
- Integrated APIs into data workflows to automate real-time access to external data sources
- Utilized VBScript and VM to automate weekly productivity reports

Methodist Physicians Clinic

Data Scientist

May 2023 – May 2024

- Generated over \$1 million in additional revenue by leveraging data analytics to identify and rectify improper insurance denials
- Implemented data driven solutions that resulted in a 66% reduction in outpatient surgery denials for 2023
- Worked closely with AKASA to integrate machine learning into existing workflows to facilitate automation within authorizations and eligibility
- Developed SQL queries to aggregate and analyze large datasets, providing insights for strategic decision-making
- Spearheaded cross-departmental collaboration initiatives to identify opportunities for task automation

PreAccess Denials Specialist

May 2022 – May 2023

- Decreased cardiac denials by over 50% by providing in-depth education to employees
- Compiled and evaluated yearly colonoscopy denials to calculate and analyze loss of revenue
- Created live dashboards to track denial trends for high risk departments
- Coordinated with data science to create live dashboards via Tableau for employee productivity
- Tested new applications for potential end-user errors and bugs

Emily Uehling

PreAccess Advocate	Sept 2021 – May 2022
• Tripled patient load by redefining the bariatric clinic process • Collected data for Quality Initiative project that analyzed lowering of Post-Surgical A1Cs • Obtained insurance authorizations for all imaging and surgical procedures • Screened patient intake paperwork to determine if patient qualifications were met • Created program via excel to track patient progress	
Surgery Scheduler	March 2020 - Sept 2021
• Obtained multiple insurance accreditations to include a wider range of patients • Provided patients with pre-operative education according to their surgery • Trained incoming employees on applications and clinic workflow • Communicated and collaborated with multiple physicians, hospitals and insurance companies	
Receptionist	Sept 2019 - March 2020
• Provided administrative support by managing patient records and coordinating with other departments • Verified insurance information, processed insurance claims and explained payment options to patients • Effectively addressed patient concerns and resolved issues to ensure a positive patient experience	

Technical Skills

• SQL • Python • R • Tableau • PowerApps	• Alteryx • Snowflake • Databricks • SAP	• UIPath • PySpark • Power Automate • ServiceNow
